*Whatever your requirements in locker, cubicle and changing room furniture you are certain to find the solution within the System product range.*

*All production from the first cut to the final packing takes place in the UK factory. Here they have invested millions over the last few years maintaining plant and facilities to industry-leading standards.*

*This has been matched by heavy spending on research and development to ensure that design, materials and construction continue to improve. They are not a company to rest on its laurels.*

*An integrated design service can tailor solutions that consistently show short and long-term savings compared to less-sophisticated layouts and components.*

*For the end-users the benefits of all this become apparent in more efficient use of space, reduced maintenance costs and an all-round better locker room environment.*

*Locker bodies crafted from top-grade mild steel*

*Return flange secures lock mechanism for greater security.*

**Optional Heavy Duty door.** Solid Grade laminate for high level security

**Optional Vision door.** Includes inspection panel in tough, 5mm clear acrylic

Stove enamel for superior finish and wide range of vibrant colours

**Optional Toughened door.** Double-skinned for added strength

Camlocks fitted as standard. For lock options see page 11

Typical configurations are shown. See product pages for full ranges.

# Vedette - Standard Lockers

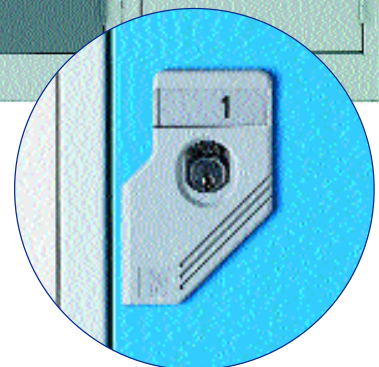

*Vedette 1300 standard lockers are available in a variety of configurations from full length to multi-compartment units offering up to six users secure storage.*

*These mild steel lockers are produced in a range of widths and depths to match storage requirements and available space easily.*

*With a comprehensive range of modern colours plus the options of stands, stands with seating, sloping tops and ventilation their outstanding versatility provides off-the-shelf, cost-effective solutions to the majority of storage requirements, including those dictated by Health and Safety regulations.*

*Sloping tops are available to meet the requirements of hygiene-critical businesses*

Locker height 1,775mm

## Door options

*In an ideal world the tough steel doors supplied as standard would work for every application.*

But when it's necessary to upgrade the level of security against more determined attacks there are two possible solutions in the range. The unobtrusive double-skinned 'Toughened' provides a far stronger door with a near identical external appearance to the standard option.

*Within the well-proven bodies of the full-height 1300 range a variety of differing internal structures provide enhanced flexibility.*

System 1308

System 1307

System 1309

System 1300

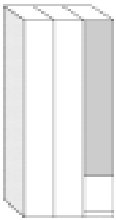

Where it is helpful to be able to monitor the contents of a group of lockers without having to open each of them in turn, the 'Vision' door with its acrylic insert is the simple choice.

The 'Heavy Duty' solution, uses an aesthetically-enhanced, robust laminate outer face and is particularly resistant to casual vandalism. It retains its smart appearance under even persistent mistreatment.

# Vedette - Specialised Lockers

## 1307 - Welled Vedette with seat option

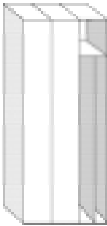

W	D	Nesting
380	450	1, 2 & 3 with seat option

Specifying a 'welled' front allows for the attachment of a seat. This is done without the need for a stand so is particularly useful where the room height is limited. The possibility of a build-up of dust on the locker floor is minimised by the incorporation of a dust removal slot at the bottom of the well plate.

Locker height 1,775mm

## 1308 - Divided Vedette

W	D	Nesting
300	300	1, 2 & 3
300	450	
380	380	
380	450	
450	450	

The Divided Vedette adds a vertical partition that gives the locker two separate hanging areas that can be used, for instance, to segregate soiled workwear from clean outdoor clothing.

Locker height 1,775mm

## 1309- Uniform Vedette

W	D	Nesting
450	450	1 & 2

The Uniform Vedette offers full length hanging plus plenty of shelving for easy-access storage of ancillary equipment, helmets and the like.

Locker height 1,775mm

## Vedette - Twin & Big Twin

Two lockers providing storage for two users within the same body.

Each user has access to an individual, full-width upper compartment and a half-width tall compartment.

Each users two spaces are operated by the same key.

This construction saves around 40% of the floorspace that would be required for two independent full-length lockers, a useful feature where space is at a premium.

The Big Twin uses its increased height to provide even more space for each user within the upper compartments. Invaluable for motorcycle helmets and other bulky gear.

### 1401 - Twin Vedette

W	D	Nesting
380	300	1, 2 & 3
380	450	

Locker height 1,775mm

### 1402 - Big Twin Vedette

W	D	Nesting
380	450	1, 2 & 3

Locker height 1,945mm

## Vedette - Golf

These 1275mm (4ft 2in) lockers, whilst originally designed for the storage of sports equipment, have found many other applications for which their reduced height makes them the most suitable choice. This includes the education market.

The Foursome has four, equal-sized compartments for the storage of smaller items.

The golf bag-sized Classic is designed to be fitted with a seating unit.

The similarly sized Club can be stacked on top of the Classic as a space saving measure.

The Professional, which is fitted with a shelf unit is primarily designed for the storage of clothing

### 1501 - Golf foursome

W	D	Nesting
380	450	1, 2 & 3

Locker height 1,275mm

### 1502- Golf classic

W	D	Nesting
380	450	1, 2 & 3 welded seat optional

Locker height 1,275mm

### 1503 - Golf club

W	D	Nesting
380	450	1, 2 & 3 welded seat optional

Locker height 1,275mm

### 1504- Golf professional

W	D	Nesting
380	450	1, 2 & 3 integrated shelf

Locker height 1,275mm

All of these, except Foursome, feature coat hooks on each side of the main compartment and a hanging rail beneath. Available with wooden doors for a touch of added style.

## Vedette - Modular

### Single door modular locker

W	D
300	300
380	380
Plinth	

Height 340mm

They can be combined to form seating or worktop areas, or can make use of dead space under windows, stairways and other awkward areas.

The lockers are available in two sizes, both with optional internal shelves. Fixings are supplied for connecting Modulares into groups, or for fixing to the optional plinths.

*For total flexibility and design freedom the Modular range takes a lot of beating.*

## Vedette - Archform

*The Archform provides non-secure, ventilated storage for clothing in locker rooms.*

W	D
850	429

Hanger shelf & rail fitted with 10 captive coat hangers & stabilising tie bar

#### Options

- Shoe rail
- 10 person coatlock bar c/w chains and locks
- Sloping top hanger shelf

It is generally used in combination with full height, 450mm deep, Vedette compartment units (Two, four compartment, units are shown in the photograph)

The Archform consists of a dust cover, hanger rail and an H-frame stabilising bar. Captive coat hangers and shoe rails can also be specified.

# General Workwear - Garment Dispenser & Collector

*If you need to make certain that clean workwear is held securely and yet is available for individuals around the clock, and that soiled workwear is both tidy and secure the managed garment system is the simple choice.*

In the Garment Dispenser each user has a lockable personal compartment

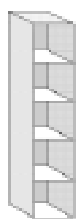

which is uniquely keyed. Two keys are supplied for each lock to guard against loss.

The operative filling the dispenser uses a single key that gives them simultaneous access to all the compartments in a unit, so there is no need for them to have to open each individual compartment.

The garment collector features a single 'posting' slot behind which there is a baffle that makes pilferage difficult. The garments can collect within the unit, or an optional laundry sack can be hung inside to make collection even simpler.

The collector door is keyed to match the service lock on the dispenser.

### 1900D - 5 compartment locker

W	D	Nesting
380	450	1

Locker height 1,820mm

### 1900D - 8 compartment locker

W	D	Nesting
380	450	1

Locker height 1,820mm

### 1900D - 10 compartment locker

W	D	Nesting
380	450	1

Locker height 1,820mm

### 1900D - 15 compartment locker

- Captive coat hangers
- Electronic solutions on application
- Replacement key service and full service contracts

## Benching

Attractive, functional and robust benches with heavy duty hanging hooks, to complement the locker systems.

3100 is constructed from 40mm square section steel tube finished in epoxy powder coat. The seating can be 'Ultrawood', hardwood, solid ash or solid-grade laminate. Dry areas only.

3200 is constructed from 40mm zinc-plated steel tube finished with Plascoat high humidity finish. The seating can be 'Ultrawood', hardwood, solid ash or solid-grade laminate. Primarily intended for use in wet areas.

3500 is constructed from 25mm square section steel tube, stove enamelled in standard locker colours. The seating can be either 'Ultrawood' extruded polymer or solid ash. Dry areas only.

*Also available:* Wall and island bench seating, cantilever seating and wall to floor bench seating, all of which can be ordered with optional hook boards.

## Colour options

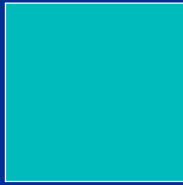

**Standard** - Stove enamelled standard door colour options for lockers.

ICE

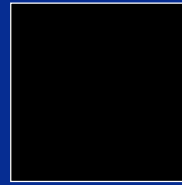

NIMBUS

ROCKPOOL

SMOKE
